

**Antonia Scrase**

BSc (Hons) Environmental Science and Water Resources

**Principal Officer Mine Closure, Department of State Development SA**

Antonia brings 11 years' experience working both in private industry and Government. In her roles as an environmental consultant, she specialised in contaminated site, hydrogeological and geotechnical investigations, brown field remediation and earthworks.

In the last 3 years Antonia has been employed in Mining Regulation for the South Australian Government. She has brought her private industry experience and competencies and applied it in the positions of Senior Project Manager and the Manager Mine Completion, incorporating the management of former mines including Brukunga Mine Remediation Project. She was responsible for multi-million dollar budget, tender negotiations, a team of five and numerous technical projects.

Currently she holds the position of Principal Officer Mine Closure, working within both the Mining Assessments and Compliance Teams. Antonia is in the process of reviewing and updating SA's policies, procedures and guidelines for Mine Closure, with the aim of limiting long term liabilities for Government and providing a clear pathway to successful mine closure and mining lease surrender for mining companies. She currently sits on professional committees for mine site rehabilitation conferences.

The resource industry offers continual knowledge progression with the potential for career advancement. There are many challenges surrounding successful mine closure, that will continue to develop, motivate and engage me.
